

Army Research Laboratory (ARL) R&D Support

Scope: To provide R&D services to support the application of technology to solve unique mission requirements related to DOD objectives, transformation of the U.S. military and the Global War on Terrorism. The scope of this contract is to perform services to support research, development, limited acquisition, and logistics support for items and systems supporting ARL, US Army, US Special Operations Command, and Department of Defense (DoD) objectives. Contract covers nine mission areas and ten different technical areas. Subcontractor pass-through is allowed. There is no minimum percentage of the work that must be performed by Battelle.

User Restrictions: Use of this vehicle is open to DoD users and other Government agencies. It cannot support state and local government entities.
