

National Defense Center for Environmental Excellence (NDCEE)

Scope: This task order provides a full range of scientific and engineering services to support the transition of technologies to meet high priority environmental, safety and occupational health (ESOH) technology needs across the Federal government. The emphasis is on demonstration and validation and technology transfer to both government and commercial users.

- Hazardous waste treatments
- Management of RCRA-type wastes
- Waste minimization
- Municipal solid waste and incineration issues
- Management and treatment of hazardous air pollutants
- Medical waste disposal
- Mixed waste management and disposal
- Remediation of contaminated sites
- Chemical and biological weapons destruction
- Recycling of materials
- Water treatment issues and water use and reuse
- Pollution of ground and underground storage tanks
- Nuclear waste management and disposal
- Corrosion prevention and control
- Solvent substitution and aqueous based cleaners
- Ozone depleting substances
- Location, removal, and demilitarization of UXO
- De-manufacturing of electronic equipment for recycle and reuse
- Alternative energy use solutions
- Fossil fuel conservation solutions (reduction of DOD's carbon footprint)
- Safety initiatives/technologies to reduce preventable accidents
- Occupational Health initiatives such as facilitation of increased participation in the OSHA Voluntary Protection Program
- Occupational health improvement technologies

User Restrictions: Use of this contract vehicle is open to Federal government and commercial users. It cannot be used by state or local entities.
